

Thomas D. Fenner
Executive Vice President of Global Manufacturing Services

Thomas D. Fenner is Executive Vice President of Global Manufacturing Services for Oshkosh Corporation. Fenner is responsible for improving operational excellence throughout all domestic and international manufacturing facilities across the Corporation's four business segments – Access, Defense, Fire & Emergency and Commercial. He will spearhead activities to continually improve operational efficiencies, drive lean initiatives, balance production levels and inventories with market demands, improve quality and delivery performance and expand Oshkosh Corporation's global production capacity. He was appointed to this position in September 2008.

Fenner most recently served as Executive Vice President and President of the Fire & Emergency segment. Fenner will continue to serve as a principal officer of the Corporation.

Fenner has held increasingly broad and responsible positions since joining the company in 1982, primarily in the areas of operations. In 1998, he was promoted to Vice President of Manufacturing Operations at the company's refuse and concrete subsidiary, McNeilus Companies, Inc. with primary responsibility for production, quality, procurement and testing of McNeilus® brand commercial products. In 1999, Fenner returned to Oshkosh and assumed the same responsibilities for Oshkosh Corporation's defense and commercial products. In 2002, he assumed the same responsibilities at the company's fire apparatus subsidiary, Pierce Manufacturing Inc. In 2004, he returned to Oshkosh as Vice President and General Manager for Airport Municipal Products.

Before coming to Oshkosh, Fenner served in the United States Marine Corp. and held positions at E-Z Paint Corp. and Pewaukee Sanitary District.
